Introduction

Listing 1: src/main.c

```
1 #include <stdio.h>
2 #include <unistd.h>
3
4 #include "interpreter/interpreter.h"
5
6 int main(int argc, char** argv){
7     FILE *input;
8
9     if(argc >= 2) {
10         // open a file stream
11         input = fopen(argv[1], "r");
12     } else {
13         // Just read from standard input
14         input = stdin;
15     }
16
17     // interpret input
18     interpret(input, argc >= 2 ? argv[1] : NULL);
19 }
```
